

HAND WASHING PROCEDURES

Source: World Health Organization. Regional Office for Western Pacific. *Interim guidelines for national SARS preparedness*. Manila: WHO, 2003, page 45.

- ☞ Rub hands together, covering all surfaces of hands and fingers, until hands are dry.
- ☞ Do not rinse.
- ☞ **Note:** When there is visible soiling of hands, they should first be washed with soap and water before using waterless hand rubs, gels or alcohol swabs.
- ☞ If soap and water are unavailable, hands should first be cleansed with detergent-containing towellettes, before using the alcohol-based hand rub, gel or swab.
